

## Data Declaration

### Table 24

#### Property Stolen and Recovered, by Type and Value, 2006

The FBI collects these data through the Uniform Crime Reporting (UCR) Program.

#### General comments

- This table provides property types, the reported value of stolen property and of recovered property. The table also lists the percentage of recovered value of each property type.
- This table furnishes the number of law enforcement agencies that supplied supplemental data and the population represented by those agencies.

#### Methodology

- The data used in creating this table were from all law enforcement agencies submitting at least 6 months of complete property stolen and recovered data for 2006.
- The FBI computes dollar value lost and recovered data for murder, forcible rape, robbery, burglary, larceny-theft, and motor vehicle theft.

#### Population estimation

The FBI calculated 2006 state growth rates using revised 2005 state/national population estimates and 2006 provisional state/national population estimates provided by the U.S. Census Bureau. The FBI then estimated population figures for city and county jurisdictions by applying the 2006 state growth rate to the updated 2005 U.S. Census Bureau data.
